

Dear Dan

On behalf of the IBM Australia team who participated at AusCERT 2011 (Australia's largest security conference) we wanted to pass on our sincere appreciation for your contribution to ensuring our presence at this major event was a memorable and successful one.

You certainly have an excellent talent for magic that still have many of us baffled as to how you did it! You created a lot of interest and exceeded our objective of getting delegates returning to the IBM stand numerous times and handing over discussions to the sales team to capture details or start conversations. We were also impressed with your ability to align your "illusion" magic tricks to our message of "Tackling the illusion of absolute security".

We have no hesitation in recommending Dan the Magic Man for any applicable corporate function, particularly as we learnt Dan's high skill level displayed has no age barrier.

Sincerely

Lisa Eastley

Ps. Please see attached a few photos from the event as a memento
